Body Diameter:

5.970 inches

Body Inside Diameter:

4.140 inches

End Application:

Iro class, fuel system

Temperature Rating:

Between -45.0 degrees fahrenheit and 225.0 degrees fahrenheit

Bodylength:

Between 16.000 inches and 16.700 inches

Filtering Media Design:

Mesh single filtering media response

Product Name:

High capacity filter

Special Features:

Hardware material corrosion protected metal end caps and core; filter media inertmicro-glass fibers impregnated and bonded with stable resin, supported upstream and downstream with polymer mesh; collapse rating 150 psid; removal rating beta 3.6.12.25 greater than 200

Media For Which Designed:

Fuel/oil, hydrocarbon

Style Designator:

Cylindrical w/open ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
