**End Application:**

Used on seawolf class submarine-nuclear reactor boundry area

**Mesh Size:**

150.0

**Filtering Media Design:**

Mesh single filtering media response

**Special Features:**

Material-titanium; temperature - 160 degrees fahrenheit; 150.0 mesh screen with 0.004 particle retention 8.700 long o.D. To fit i.D. Of mk-3;  
50 psi water pressure

**Media For Which Designed:**

Water

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A24000
