Filtration Rating In Microns:

3.0

End Application:

Filter assembly

Design Type:

Reusable

Filtering Media Design:

Mesh single filtering media response

Product Name:

Stainless steel filter element

Special Features:

Elements are recleanable by backflushing or ultrasonic washing. The elements consist of five layers of precision-woven 316l stainless steel mesh formed into cylinders and sintered together with the filter layer being supported, protected, and prefitted by two inner and two outer layers. 03 (3 micron) is recommended for the removal of pipe scale from steam.

Material:

Steel filtering medium

Material Specification:

Ss-140-03 mfr ref all material responses filtering medium

Media For Which Designed:

Water

Style Designator:

Conical w/out container

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A24000
