End Application:

Crew shelter (inls) kdf208680-m

Product Name:

Filter, tank top

Special Features:

Part number breakdown: fta=15 gp (basic assembly); 2=double length(bowl/element); a=nitrile seals; 10q=microglass iii (element media); p=plugged (indicator); 25=25 psid (bypass); s8=sae8 (ports); y=all (breather, fill port, bowl adaptor); pressure ratings: max. Allowable operating pressure-150psi; rated fatigue pressure-100 psi; design safety factor: 2: 1; operating temperature: -22 degrees f - 230 degrees f; element collapse rating: 150psi (standard); materials: head, aluminum; cover, aluminum; bowl, mild steel (fta) ; breather, 5 micron cellulose

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
