End Application:

Crew shelter (inls) kdf208680-m

Temperature Rating:

250.0 degrees fahrenheit and -30.0 degrees fahrenheit

Maximum Operating Pressure:

6000.0 pounds per square inch

Product Name:

Filter, high pressure

Special Features:

Part number breakdown: seals-nitrile; 18p=3/4in. Port (model no); 1=single element length; 10q=10 micron, absolute; m2=visual/auto reset (indicators); 98=98 psi (bypass); m4m4=12 sae thread (ports); 1=bypass option; pressure rating: max. Allowable operating pressure 6000psi; rated fatigue pressure 6000psi; design safety factor 3: 1; operating temperature: -30 degrees f - 250 degrees f; element collapse rating 300 psi (standard); materials: head sg iron, bowl steel, indicator stainless steel body, plastic connector

Material:

Steel sediment bowl

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
