End Application:

Nha: filter, regulator, lubricator combination

Product Name:

Combination unit, filter, regulator, lubricator

Special Features:

Fluid compressed air; max. Pressure 250 psig; operating temperature -30 degrees f to 175 degrees f; body and bonnet material aluminum; bowl material aluminum; elastomers neoprene and nitrile; manual, automatic drain connection 1/8in.; port size 1/2in.; element 40 micron

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
