End Application:

Used on fairfield encounter cable vessel; seismic research vessels etc

Output Capacity:

44.0 gallons per minute

Special Features:

Lgth 31 in; width 22 in; ht 48 i n; ships bilge water separator; bilge alarm; 110/120/220 vac; 50/60 hz; single phase; 0.45 kw; 1 m/hr flow rate; consists of: positive displacement pump; vertical process vessel; corrugated matrix; polishing pack; oil sensor probe; oil content monitor; oily water inlet/outlet check valves, 15 ppm or less; pressure relief valves; clean water recirculation inlet/outlet valves; process sample valves; all necessary piping, gages, switches, wiring, control panels

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
