End Application:

3655-00-722-3901

General Description:

Material heating elements copper alloy; tubing for fluid stainless steel; height 25.20in., width 17.00in.' thickness 3.88in.; three u-shaped heating elements and the tubing are cast inside an aluminum alloy casting; height of aluminum casting is 20.62in. With terminal ends of heating elements protruding 4.58in.; width of casting is 12.00in. With tubing protruding 3.50in. And tubing supports 1.50in.; thickness of casting is 2.00in. With tubing protruding 1.88in.; heating elements are 480volts, connected in 3-phase delta configuration totalling 9000watts
