**General Description:**

Hot surface made of beryllium ceramic; cold surface made of alumina ceramic; both surfaces lapped flat with no metalization; 30mmx30mm square and 5.6mm thick; contains 21 couples; current input 9.0amps, voltage input 3.75volts dc, heat pumped 18.8watts; the two leads are 18 gauge stranded pvc insulated wire 4.5in. Long; operating temp range -250deg f to +220deg f

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
