End Application:

Waters class tags-45

Heat Transfer Method:

Indirect

Special Features:

This is the core with steel cabinet; no dimensions given; the fins are unique young-prionered, automatic induction; aluminum fins mechanically bonded to high pressure round steel tubes

Material:

Stainless steel tubes

Material Specification:

Am-8348 mfr ref all material responses tubes

Special Test Features:

operating temperature is 400 degrees f or 205 degrees c; test pressure is 450 psi or 3100 kpa

Style Designator:

Straight finned tube, cylindrical

Test Data Document:

9g265-a-83448 standard (includes industry or association standards, individual manufactureer standards, etc.). And 67049-a-8348 standard (includes industry or association standards, individual manufactureer standards, etc.).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A28500
