**Diameter:**

20.000 inches

**Length:**

63.125 inches

**Capacity Rating:**

3600.0 gallons per hour

**Connection Type:**

Flanged pipe heated fluid inlet

**Heat Transfer Method:**

Direct

**Connection Diameter:**

4.000 inches heated fluid inlet

**Product Name:**

Heater circulation

**Special Features:**

Element rating: 2.153 kw at 440v; total heater rating: 155 kw at 440v; pressure/temperature: 190 psi at 95f; operating pressure: 190 psi; hydrostatic pressure: 260 psi; life: designed for 10000 hrs of trouble free operation and 50000 on-off cycles at normal operating condition; heats 3600gph of diesel fuel to 85 degrees f.

**Height:**

30.000 inches

**Material:**

Stainless steel

**Style Designator:**

Coiled plain type

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A28500
