Product Name:

Oil cooler

Special Features:

Heat exchanger material: aluminum; fan material: plastic; motor: aluminum housing, steel gears and shaft; cooler spec: viscosity (max.) 2000 cst, oil temperature (max.) 266 degrees f, operating pressure (max.) 230 psi, fluid: mineral oil to din 51524; hydraulic motor spec: filtration: iso/dis 4406 code 19/16-filtration grade b25775, outlet pressure (max.) 29 psi, viscosity range 10-600 cst (recommended 30-45 cst), temperature range 194 degrees f

Material:

Steel housing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A28500
