| Current Type:                             |
|---|
| Dc  |
| Inside Width:                             |
| 60.000 inches                             |
| Maximum Operating Temp:                   |
| 800.0 degrees fahrenheit                  |
| Inside Depth:                             |
| 72.000 inches                             |
| Inside Height:                            |
| 72.000 inches                             |
| Tempurature Control Method:               |
| Automatic                                 |
| Wattage Rating:                           |
| 22.0 kilowatts                            |
| Circulation Method:                       |
| Forced                                    |
| Work Protection From Heat Source:         |
| Complete                                  |
| Normal Operating Tempurature Range:       |
| +150.0/+800.0 degrees fahrenheit          |
| Cabinet Double Wall Construction:         |
| Not provided                              |
| Insulated Cabinet:                        |
| Not provided                              |
| Cabinet Exhaust Vent:                     |
| Not provided                              |
| Cabinet Fresh Air Intake:                 |
| Not provided                              |
| Voltage In Volts:                         |
| 240.0 and 480.0                           |
| Phase:                                    |
| Three                                     |
| Frequency In Hertz:                       |
| 60.0                                      |
| Supplementary Features:                   |
| For overhaul and repair of f100 augmentor |
| Shelf Life:                               |
| N/a                                       |
| Unit Of Measure:                          |
|   |
| Demilitarization:                         |

No
