End Application:

F-100 unified fuel control

General Description:

High pressure externally-heated desiccant drier; temp of air entering drier 125 degrees f; air pressure 800 psig; air flow 85 scfm min, 350 scfm max; operation fully automatic; drying cycle standard 8hr nema cycle; 115v ac, 60 cycle, single phase; regenerated at atmospheric operating pressure; desiccant vessel pressure of 880 psig at 650 degrees f; desiccant type activated alumina

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
