**Bodyheight:**

10.000 inches

**Bodylength:**

46.000 inches

**Bodywidth:**

32.000 inches

**Special Features:**

Designed to provide clean, dry air at medium pressure, 450 psig; moisture is removed by passing incoming wet air through a membrane module; particulate matter and aerosols are removed by a particulate filter and a coalescing filter; built in accordance w/lpd 17 specification 6259k; welded in accordance w/s9074-ar-gib-010/278; qualified to mil-s-901c, hi impact shock, grade a, mil-std-167-1, vibration shipboard; electronic components in humidity monitor are emi-qualified to mil-std-461 & subjected to environmental stress screening; outlet capacity: 0-10 scfm; inlet air condition (defined by spec) : 450 psig 55 degrees f to 125 degrees f, maximum dewpoint 48.2deg f @ 450 psig; outlet air conditions: maximum dewpoint of 14.9 degrees f at pressure, pressure not more than 5 psig below inlet; elect requirements: 115 vac, 60 hz., 1 phase, 500 w; weight: 160 lbs

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T247-b
