End Application:

Automatic desiccant dehydrator

Bodyheight:

133.0 millimeters

Bodywidth:

483.0 millimeters

Product Name:

Dehydrator unit, reactivating

Special Features:

Operating temperature: 1 degree celcius through 40 degrees celcius; input mains power: 24 or 48 volts dc; power consumption 11 watts; versatile mounting capability, mounts directly in standard 19 inch relay racks

Supplementary Features:

Automatically activated unit designed for low volume air-dielectric or waveguide systems of 0.1 to 10.0 cubic feet (283 liters); flows up to 0.05 cubic feet (1.4 liters) of dry air per minute

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T247-b
