Body Material:

Aluminum alloy

Usage Design:

Used for preserving moisture; to protect chemicals which are hygroscopic or react with water from humidity; each item contains about .25 unit (6 grams) of desiccant and mounts through a 1.05" (26mm) dia. Hole; type of indicator element: 40(40%rh); gasket material per ams-r-6855, class ii, grade 80; wt. 0.11 lbs; has hex nut with torque value 30"-lbs(3.4.M)

Desiccant Type:

Silica gel

Bodyheight:

2.20 inches

Dispersion Tube:

Not included

Product Name:

Dissectors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T247-b
