Overall Height:

69.000 inches

Overall Diameter:

24.000 inches

Special Features:

Unit used in machining operation of turbine front bearing cage; unit will have 2- hp blower which will produce enough suction to prevent metal spray dust from being spread throughout shop area; unit contains spark resistant aluminum fan wheel, 5 inch diameter casters, weight 500 lbs.; 2.0 hp motor, 740cfm, 3600 fan rpm

Fsc Application Data:

Air purification equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T282-t
