**End Application:**

Starter motor, vent fog precipitator (vfp)

**Special Features:**

Kit contains: 6 ionizing wires p/n 220111-905, 6 ionizing wires p/n 220111-908, 2 coin envelopes p/n 125885-001, 1 ionizing wire replacement kit drawing, and 1 mailing bag p/n 126167-050; ionizing wires charges air oil mist so it can be removed by collecting cells which have alternating positive and negative charges. The cells act like a magnet pulling and pushing the charged oil mist into collecting cells

**Functional Description:**

Used on lub oil vent systems, turbine generators and reduction gears to take particulates out of the air by ionizing the air particles

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
