Overall Length:

73.000 inches

Overall Height:

45.000 inches

Overall Width:

27.000 inches

Filter Material:

Carbon, activated and paper and plastic, polyester

Filtration Rate:

1900.000 cubic feet per minute

Special Features:

2high voltage remote intake manifold (rim) 480 vac, 3 phase, 5 hp motor; steel enclosure with recessed door and latches, locking casters, lifting eyes, tie downs, fork lift undercarriage, and motor guards; 80% effective in capturing particulate matter as small as 0.3 microns; 16.5 in. Blower; california/south coast air quality management district approval; portable device designed to evacuate fugitive particulate matter from liquid spraying, sanding, grinding or welding operations; item name: papce with remote intake manifold (rim); motor control, sealed filter enclosure, filter arrangement to suit appliction, flexible duct to a remote intake manifold with four arms without internal supports, intake hoods and filter efficiency monitoring device.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
