Pressure Rating:

80.0 pounds per square inch and 120.0 pounds per square inch

Voltage In Volts And Current Type:

16.0 dc or 115.0 ac

Special Features:

The breather box consists of a 1st stage filter for bulk h2o and particles, 2nd stage filter for oil and ultra-fine particles and a 3rd stage filter for organic vapor and odor removal; filter efficiency is 99.9 percent @ .01 microns; built-in co2 monitor; 125 psi relief valve; external case with warning lights and alarms; 100 cfm with 8 respirator couplings; flowmeter and psi gage included; auto drains on 1st and 2nd stages

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
