Criticality Code Justification:

Zzzy

General Description:

Kcase outline: 20 pin dip, operatingtemperature: -55deg.Cen.To +125deg.Cen.Quality assurance requirements: all devices to be tested to class b screeninglevel of mil-std-883.Absolute ratings: supply voltage +8.0v, operatingvoltage range: +4v to +7v, input voltageapplied: gnd -2.0v to +6.5v, output voltage applied: gnd-0.5v to vcc +0.5v, storage temp.Range: -65deg.Cen.To +150deg.Cen., operating temp.Range military: -55deg.Cen. To +125deg.Cen., max.Power dissipation: 1 watt

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
