| Current Type:                      |
|------------------------------------|
| Ac                                 |
| Heating Element Wattage Rating:    |
| 24000.000 single                   |
| Voltage In Volts And Current Type: |
| 230.0 ac                           |
| Voltage In Volts:                  |
| 230.0                              |
| Phase:                             |
| Three                              |
| Frequency In Hertz:                |
| 60.0                               |
| Shelf Life:                        |
| N/a                                |
| Unit Of Measure:                   |
|                                    |
| Demilitarization:                  |
| No                                 |
| Fiig:                              |
| T285-a                             |
|                                    |
|                                    |
