| Overall Length:                  |
|----------------------------------|
| 28.000 inches                    |
| Overall Width:                   |
| 12.000 inches                    |
| Mounting Method:                 |
| Affixed end bearing shaft        |
| Overall Thickness:               |
| 6.000 inches                     |
| End Application:                 |
| Air control damper, model p-2341 |
| Positioning Holder Type:         |
| Quadrant                         |
| Material:                        |
| Steel, corrosion resisting       |
| Material:                        |
| Stainless steel                  |
| Surface Treatment:               |
| Zinc                             |
| Shape:                           |
| Rectangular                      |
| Surface Treatment:               |
| Zinc                             |
| Shelf Life:                      |
| N/a                              |
| Unit Of Measure:                 |
|                                  |
| Demilitarization:                |
| No                               |
| Fiig:                            |
| T114-a                           |
|                                  |
|                                  |
