Body Style:

Finned, tubular, u shaped

Element Radiation Specification:

Noninfrared

Heat Control Type:

Thermostat

Thermostat Range:

+55.0/+105.0 degrees fahrenheit

End Application:

Heater, space, electric, e.L. Wiegand div., emerson electric co., hch-10mm

Maximum Wattage Rating In Watts:

100.0 single voltage

Element Quantity:

1

Voltage In Volts And Current Type:

150.0 ac single voltage

Special Features:

Sheath 0.475 in. Od; rtv sealed terminals; zinc chromate primer and one finish of light neutral gray enamel

Material:

Nickel alloy sheath

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01900
