**Body Style:**

Finned, tubular, u shaped

**Element Radiation Specification:**

Noninfrared

**Heat Control Type:**

Thermostat

**Thermostat Range:**

+55.0/+105.0 degrees fahrenheit

**End Application:**

Heater, space, electric, e.L. Wiegand div, emerson electric co., hch-35mm

**Maximum Wattage Rating In Watts:**

350.0 single voltage

**Element Quantity:**

1

**Voltage In Volts And Current Type:**

120.0 ac single voltage

**Special Features:**

Rtv sealed terminals; zinc chromate primers and one finish of light neutral gray enamel

**Material:**

Nickel alloy sheath

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A01900
