| Mounting Type:                  |
|---------------------------------|
| Ceiling suspended               |
| Heat Medium Type:               |
| Air                             |
| Heat Outlet Quantity:           |
| 1                               |
| <b>Heat Delivery Direction:</b> |
| Horizontal                      |
| Heat Discharge Outlet Type:     |
| Adjustable                      |
| <b>Heat Directing Device:</b>   |
| Adjustable louver               |
| Air Circulation Device:         |
| Propeller fan                   |
| Circulated Air Type:            |
| Heated                          |
| Width:                          |
| 8.000 inches                    |
| Current Type:                   |
| Ac                              |
| Depth:                          |
| 6.000 inches                    |
| Prime Mover Type:               |
| Electric motor                  |
| Operating Control Type:         |
| Thermostatic                    |
| <b>Current Rating In Amps:</b>  |
| 2.2                             |
| Heating Element Type:           |
| Electric nonimmersion           |
| Inclosure Material:             |
| Stainless steel                 |
| Heat Delivery Rate:             |
| 853.0 british thermal unit      |
| Voltage In Volts:               |
| 110.0                           |
| Phase:                          |
| Single                          |
| Frequency In Hertz:             |
| 60.0                            |
| Height:                         |
| 10.000 inches                   |
