Body Style:

Tubular, double terminals

Element Radiation Specification:

Noninfrared

Heat Control Type:

Thermostat

Element Connection Style:

Shielded wire lead

End Application:

Navy weapon system code th strategic sealift conversion ships class

Element Quantity:

1

Voltage In Volts And Current Type:

480.0 ac 2nd voltage

Phase:

Single all voltages

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A01900
