Mounting Type:

Hand carry

Heat Medium Type:

Air

Diameter:

23.000 inches

Operating Control Type:

Automatic control switch and hand switch

Heating Element Type:

Burner

Ignition Method:

Manual

Inclosure Material:

Aluminum

Fuel Consumption Rate Per Hour:

2.0 pounds

Heat Delivery Rate:

44000.0 british thermal unit

Fuel Feed Method:

External pressure

Special Features:

Bsafety gas shutoff valve, excess flow check valve, pressure regulator setting of 28" wc; furnished with 18" long x 1/4" id hose and a support arm that allows heater to be attached to lp cylinder

Fuel Type:

Propane

Height:

10.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01300
