Body Style:

Cable, band or tape type

Terminal Quantity:

2

Element Radiation Specificationtrum:

Noninfrared

Element Connection Style:

Wire lead

Watt Density Rating:

1.25 per square inch single voltage

End Application:

Navy weapon system code th, strategic sealift conversion shops class

Element Quantity:

1

Voltage In Volts And Current Type:

240.0 ac single voltage

Special Features:

Heating cable; 15w/ft; process temp 250.0deg.F; construction: 2 copper (14 awg)bus wires separated by a fluoropolymer spacer, encircled by self-regulating conductive fibers, with a layer of fluoropolymer insulation, copper braid and red fluoropolymer outer jacket; end connections are stripped two wires, mfg recommends power (pmkg-jlp) and end (pmkg-le)connections; mounted by tape; used in hazardous areas and on surfaces w/required groung path

Material:

Plastic resistance wire embedding/support insulation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01900
