Overall Length:

25.500 inches

Overall Diameter:

Between 0.388 inches and 0.440 inches

End Application:

Plastics processor compress melt unit assembly, naval sea systems command

Wattage Rating:

17.000 kilowatts and 20.000 kilowatts and 25.000 kilowatts

Voltage In Volts And Current Type:

230.0 ac/dc

Special Features:

Chamber heater-cooler assembly, rear; plastic waste processor shreds, melts and compresses plastic into sanitized disks for storage and later recyclin

Thread Size And Series/type Designator:

0.190-32 unf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
