Overall Length:

48.000 inches

Overall Width:

30.000 inches

End Application:

Damper

Special Features:

Damper made of 0.188 inch carbon steel, blades 14 ga. Stainless, axles 0.5 inch 303 stainless steel, bearings are oil impregnated bronze sleeve, finish is hot dipped galvanized on carbon steel after fabrication but before assembly; differential pressure 12 in. Wg, veloci type 3000 fpm; includes actuator which is electrically operated

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
