Body Style:

Odd/irregular shaped items

Element Radiation Specification:

Noninfrared

End Application:

Nimitz class cvn; bench furnace

Maximum Wattage Rating In Watts:

6700.0 2nd voltage

Voltage In Volts And Current Type:

265.0 ac 2nd voltage

Special Features:

Side or top heating element for bench furnace; 12 inches wide by 24 inches long; ceramic plate with open coil alloy wire through it

Material:

Nickel alloy resistance wire

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01900
