Current Type:

Dc

End Application:

Isolation xfmr ay 4zz 42858-001-99a

Heating Element Type:

Electric nonimmersion

Product Name:

375 strip heater

Voltage In Volts:

240.0

Special Features:

Centered nickel-chrome element wire which uniformly heats the strip; 500 watts; watt density is 24; item is 0.375 thick; capable of high temperatures and high watt densities

Supplementary Features:

Applications include: food warming, freeze and moisture protection, tank and platen heating, packaging, dies and mold heating, autoclaves, ovens

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A01300
