Body Style:

Tubular, flanged, w/terminals

Terminal Quantity:

6

Overall Length:

22.125 inches

Element Radiation Specification:

Noninfrared

Element Connection Style:

Stud type

Length:

Between 18.750 inches and 19.250 inches

End Application:

Heater, water 17749 type 4

Maximum Wattage Rating In Watts:

15000.0 single voltage

Element Quantity:

3

Voltage In Volts And Current Type:

440.0 ac single voltage

Product Name:

Heating element

Special Features:

Material for resistance wire is ni/cr; material for resistance wire support insulation is ceramic

Frequency In Hertz:

60.0

Material:

Stainless steel sheath

Material Specification:

Mil-h-22577 military specification all material responses sheath

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01900

Mil-std (military Standard):

Mil-h-22577 spec.
