Air Circulation Device:

Propeller fan

Width:

26.000 inches

Diameter:

56.000 inches

End Application:

Naval expeditionary misc equipment

Heat Delivery Rate:

120000.0 british thermal unit

Product Name:

Heater port150

Special Features:

Air flow 1100 cfm at 1.5 iwg; fuel tank capaci type 22 gallons; fuel requirements df1, df2, dfa, and jp8; fuel usage 1.25 gallons per hour; power requirements 120vac-60hz; power usage 12 amps

Fuel Type:

Diesel fuel oil and jp8

Height:

31.000 inches

Supplementary Features:

Heater 120k btu/h, w/2 each 16 inch x 10 ft ducts (in stock)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01300
