Body Style:

Standard element

Width:

70.0 millimeters

Length:

140.0 major inches

Maximum Wattage Rating In Watts:

60.0 all voltages

Voltage In Volts And Current Type:

230.0 ac 2nd voltage

Product Name:

Enclosure radiant heater

Special Features:

Designed to provide electronic, pneumatic, hydraulic, and mechanical equipment from low temp, condensation and corrosion; positive temp coefficient heater unit; clip mounting on 35 mm din rails

Frequency In Hertz:

50.0 and 60.0

Material:

Aluminum sheath

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A01900
