Current Type:

Ac

Pump Design:

Two stage

Oil For Which Designed:

Number 2 fuel oil, heaviest grade for which designed

Capacity Rating:

10.00 gallons per hour

Mounting Method:

Flange

Special Features:

Designed for horizontal flame; h pressure, 4 gal per hr min; w/nozzle, 1, 45 degrees angle spray; ignition data, electric, single; operating power requirements, 110v, 60 cycles, single phase; blast tube will extend a maximum of 9 1/4 in. Into fire-box; electric controls incl, 1 switch, safety relay, 1 switch, limit control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
