**Current Type:**

Ac

**Pump Design:**

Two stage

**Oil For Which Designed:**

Number 2 fuel oil, heaviest grade for which designed

**Capacity Rating:**

10.00 gallons per hour

**Mounting Method:**

Flange

**Special Features:**

Designed for horizontal flame; h pressure, 4 gal per hr min; w/nozzle, 1, 45 degrees angle spray; ignition data, electric, single; operating power requirements, 110v, 60 cycles, single phase; blast tube will extend a maximum of 9 1/4 in. Into fire-box; electric controls incl, 1 switch, safety relay, 1 switch, limit control

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**
