Ignition Method:

Torch

Current Type:

Ac

Frequency Rating:

60.0 hertz

Drive Type:

Direct

Accessory Components And Quantity:

Motor, modulating no. M-904e mh, switch, potentiometer pressure no. L91a mh

Ignition System Design:

Single

Power Source For Which Designed:

Electric

Fuel Pump:

Included

Pump Design:

2

Fuel Grade For Which Designed:

6

Capacity In Gallons Per Hour:

60.0 and 15.0

Atomizing Cup Regulating Method:

Manual adjusting valve

Flame Control Type:

High-low

Fuel Pump Location:

Integral

Voltage In Volts:

440.0

Phase:

Three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T114-b
