General Description:

Heating element cemented to a heat dissipator, glass laminate-epoxy spacer mil-p-18177 type gee cl b, element nonimmersion strip type, noninfrared radiation spectrum, multipath nickel alloy resistance wire, fiberglass silicone rubber wire embedding/support insulation and sheath material, elec rating 115 vac 400 hz 45w, max operating temp 450 degrees f, dissipator al alloy qq-a-250/4 temp t3, finish anodize mil-a-8625 type ii, semicircular shape, o/a dim 2.87 in. Radius, 0.199 in. H, 4.50 in. Lg twisted pair elec leads 4.50 in. Lg, no. 22 awg, insulation polytetrafluoroethylene high temp mil-w-16878, 2 ea terminal lugs type ms25036-48

Shelf Life:
