Feedwater Impurities Type:

Inorganics

Tempurature Rating:

40.0 degrees celsius

Voltage In Volts And Current Type:

120.0 ac

Special Features:

Provides reagent-grade water in applications where feedwater is of reasonable purity; accomplished by cartridge, corning p/n 3508-b, vwr scientific p/n 26305-282; purity: pre-set to cutoff below 50/60 hz; mounting: wall or bench mounted; item supplied w/o cartridge; used to deionize central interface motherboards for f-16 afct

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A517j0
