General Description:

High purity water system for analytical applications; water flow rate: 1.5 liters per minute; purity rate: reduces organic carbon levels/toc to less than 15 parts per billion; cartridge data: uses 4 replaceable cartridges, 1 carbon cartridge, 2 ion exchanging cartridges, 1 organic cartridge; filter one sterilizing grade membrane filter (p/n cd0f01205) , 0.22 micrometer; circulation: automatic recirculation; mounting: can be mounted up to 6 feet away; electrical requirement: 115v

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
