Overall Width:

36.000 inches

End Application:

End item identification: recirculating water system

Maximum Discharge Flow Rate:

9.0 gallons per minute

Special Features:

Special features: recirculating water system used to wash and clean batteries without discharging directly into drain. Features: 3/4 hp pump motor, tri stage filtering, auto low ph shut off; length: 51.00 inches ; height: 49.00 inches ; width: 36.00 inches max. Discharge flow rate: 9.0 gallons per minute; material: steel resisting; end item identification: recirculating water system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
