Current Type:

Ac

Potable Water Capacity:

1.5 liters per minute

Voltage In Volts:

115.0

Special Features:

Water must be at least 18.2 meg ohms in resistance level of purity released from the system. System must have built in test on accuracy of the resistivity measurement system.

Frequency In Hertz:

60.0

Fsc Application Data:

Water purification equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T227-c
