Overall Length:

40.0000 inches

Overall Diameter:

8.000 inches

Product Name:

Thin film composite (tfc) spiral-wound reverse osmosis element

Special Features:

400 sq. Ft. Active membrane area; thin film composite (tfc) seawater membrane; 99.6 percent chloride ion rejection design; high area element construction

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
