Overall Length:

18.000 inches

Overall Height:

72.000 inches

Overall Width:

14.000 inches

End Application:

Analyzer, biofouling feedback

Product Name:

Bfa assembly

Special Features:

Shock classification is g; (bfa) biofouling feedback analyzer, electronically measures the level of chlorine in the overboard discharge line on board ship and automatically controls the production of chlorine.

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
