Overall Length:

40.625 inches

End Application:

Hypochlorite generator

Product Name:

2 cell assembly

Special Features:

Next higher assembly- hypochlorite generator p/n a1-81863; used on 7618258/7618723

Material:

Titanium

General Description:

Cathode outer shell; anode outer shell, electrode inner shell, unions plain/pinned mk i m, cone spacers, nuts, stub end split sets, labels, inlet flange assembly, outlet flange assembly, return bend assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
