Overall Length:

40.500 inches

Product Name:

Filter element, reverse osmosis

Special Features:

Element to fit 8.00 inch inside diameter pressure vessel; includes ilec interlocking endcaps; premeate flow and salt rejection is 2000 ppm naci, 225 psi, 77 degrees fahrenheit, ph 8 and 15 percent recovery

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
