Current Type:

Ac/dc

Prime Mover Type:

Electric motor

Voltage In Volts:

24.0

Phase:

Single

Special Features:

The aspen 1800bc (brief case) water purification system will supply up to 1,800 gallons per day (75 gallons per hour) of highly purified water from virtually any non-saline water source. Operates on 90 to 260 volts ac at 50 or 60 hertz, virtually any international power source, and from a 24 volt dc military connector. The 1800 comes standard with 2 unrestricted batteries that can be recharged from ac or dc power sources as well as sunlight from an optional solar package. Water can be drawn from ditches, ponds, rivers, lakes or standing water that may contain chemical or biological contamination. Dimensions: the bc unit is 22 x 17 x 13 and weighs 55lbs. The backpack unit for this set is issued separately

Frequency In Hertz:

60.0

Shelf Life:

N/a
